

Technical Data Sheet "Netztester WMR"

Brief description

The handheld measuring device "Netztester WMR" is used to determine the available Wireless M-Bus networks and their performance. Therefore, the signal strength and complete Wireless M-Bus telegrams can be received and displayed. The comprehensive, convenient Android/iOS app helps to avoid installation aborts. An export of the data as csv/JSON-file is also possible.

Technical data:

Antenna connections	1x SMA for external antennas
Internal rechargeable battery	Internal Li-Ion battery
Charging port	USB
Power supply unit	USB power plug and USB cable
Testable networks	Wireless M-Bus (OMS) Signals Wireless M-Bus Telegrams Supported modes: S, T,C and R2
Display indication	Package view (meter number & attenuation), detail view (signal attenuation, battery status, meter number)
Providing of measurement results	Display of meter number & signal attenuation; display of extended data via app and as csv/JSON-file via measurement data export. Data transfer to the app is done via Bluetooth Low Energy (BLE)

Legal information

Register entry: Local court Hamburg,
HRB 151086
VAT ID: DE305978714
Managing Director: Christopher E. Niemöller

Functions of the device

- Measurements of Wireless M-Bus networks
- Raw data view of the Wireless M-Bus telegrams
- Simulation of transmitter/receiver (2 Netztester WMR required)
- Use of own antennas
- Data export as csv/json-file

Scope of delivery

Netztester WMR, charging cable, charging plug, FAKRA adapter, carrying case, quick start guide, innovative Android/iOS-App
